

Overall, cases in India are now doubling every 8.7 days

Calculated using 3-day lagging compounded daily growth rate

The higher this number, the better for us

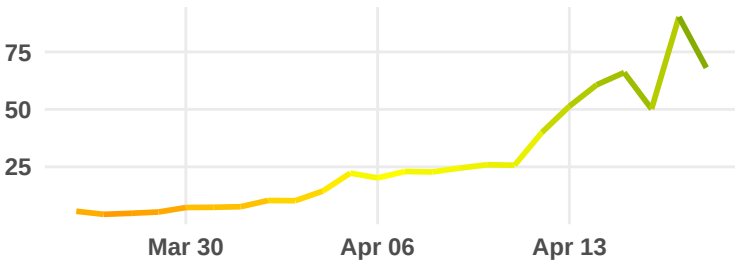

Doubling Time (number of days)

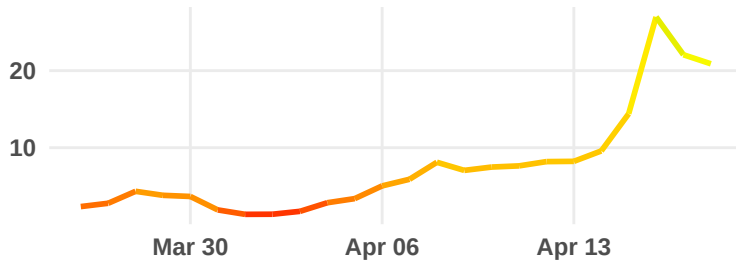

There is a massive divergence in how the disease is spreading in different states

Days to double, calculated using 3-day lagging compounded daily growth rate
Higher the better

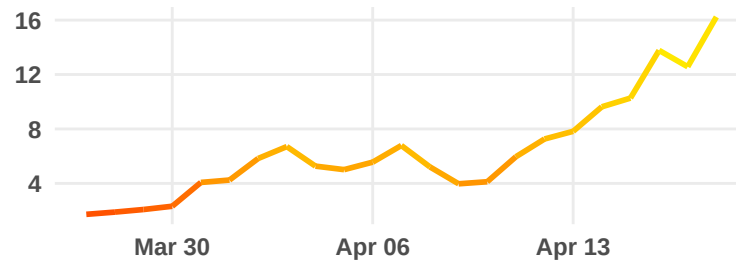

Kerala
399 total cases
Now doubling every 68.1 days

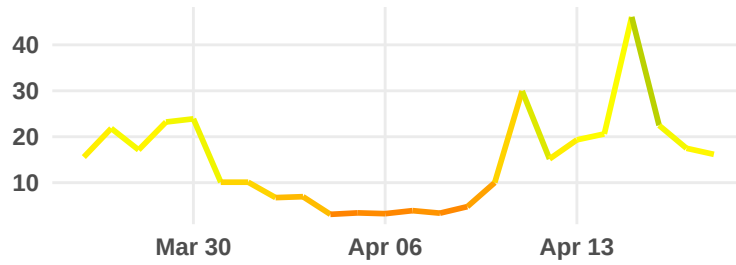

Tamil Nadu
1372 total cases
Now doubling every 20.9 days

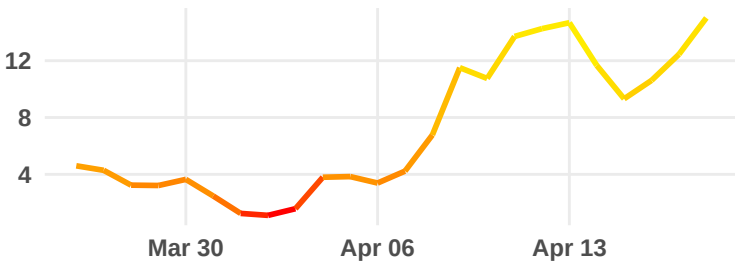

Jammu and Kashmir
341 total cases
Now doubling every 16.2 days

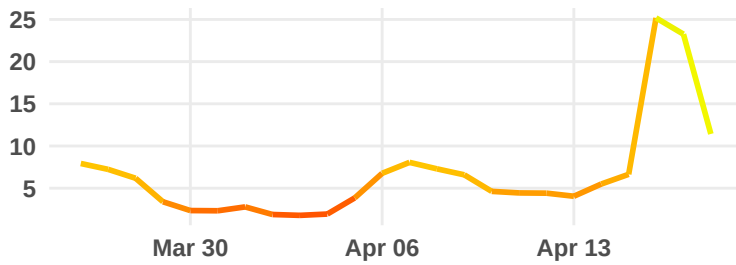

Haryana
232 total cases
Now doubling every 16.2 days

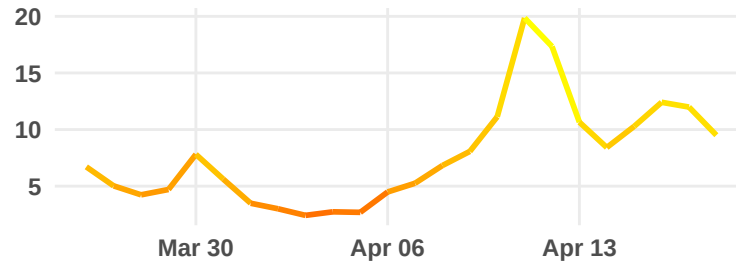

Andhra Pradesh
603 total cases
Now doubling every 15 days

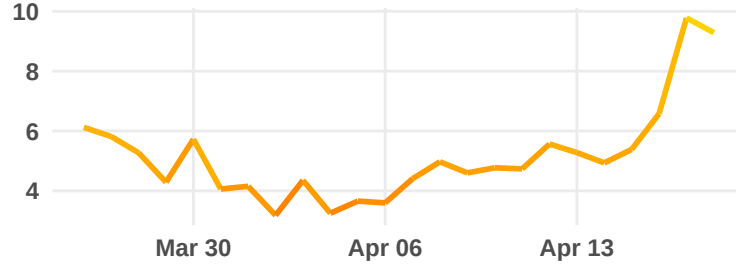

Delhi
1893 total cases
Now doubling every 11.4 days

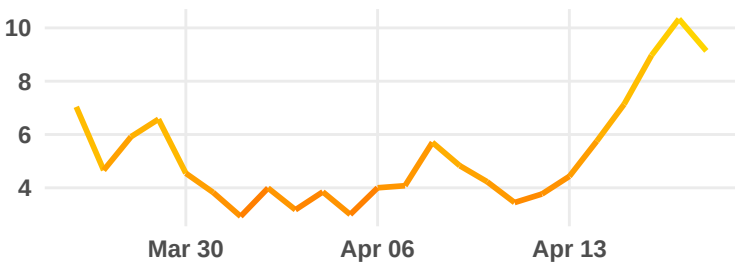

Telangana
809 total cases
Now doubling every 9.5 days

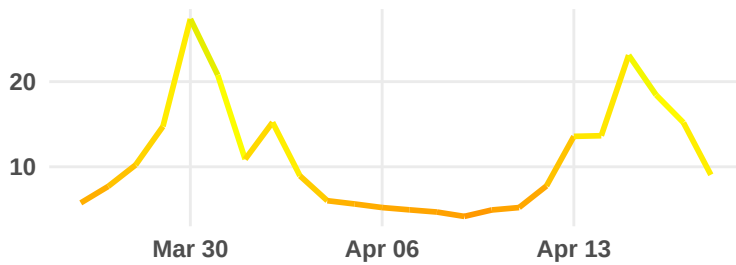

Maharashtra
3648 total cases
Now doubling every 9.3 days

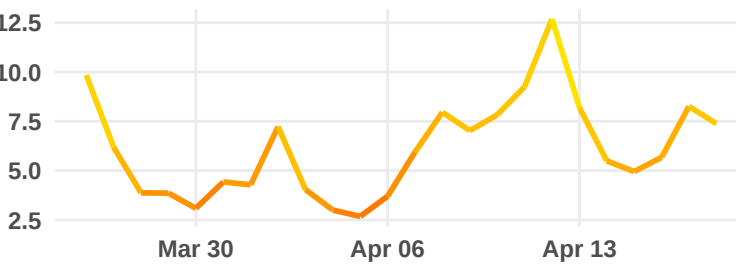

Rajasthan
1351 total cases
Now doubling every 9.1 days

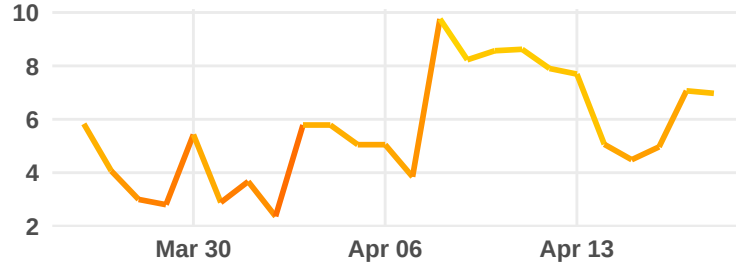

Punjab
234 total cases
Now doubling every 9.1 days

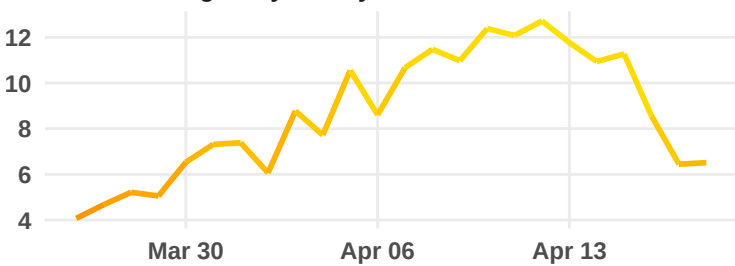

Uttar Pradesh
974 total cases
Now doubling every 7.4 days

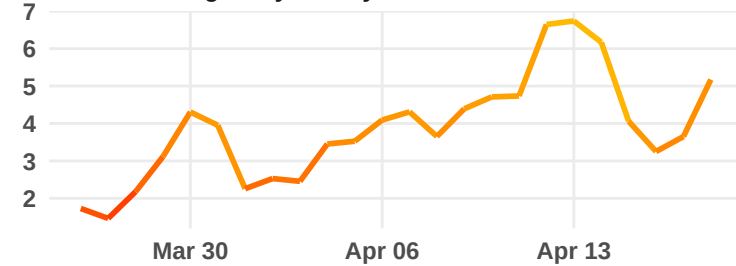

West Bengal
287 total cases
Now doubling every 7 days

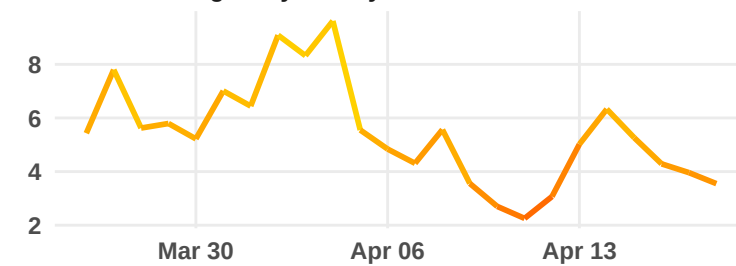

Karnataka
384 total cases
Now doubling every 6.5 days

Madhya Pradesh
1402 total cases
Now doubling every 5.2 days

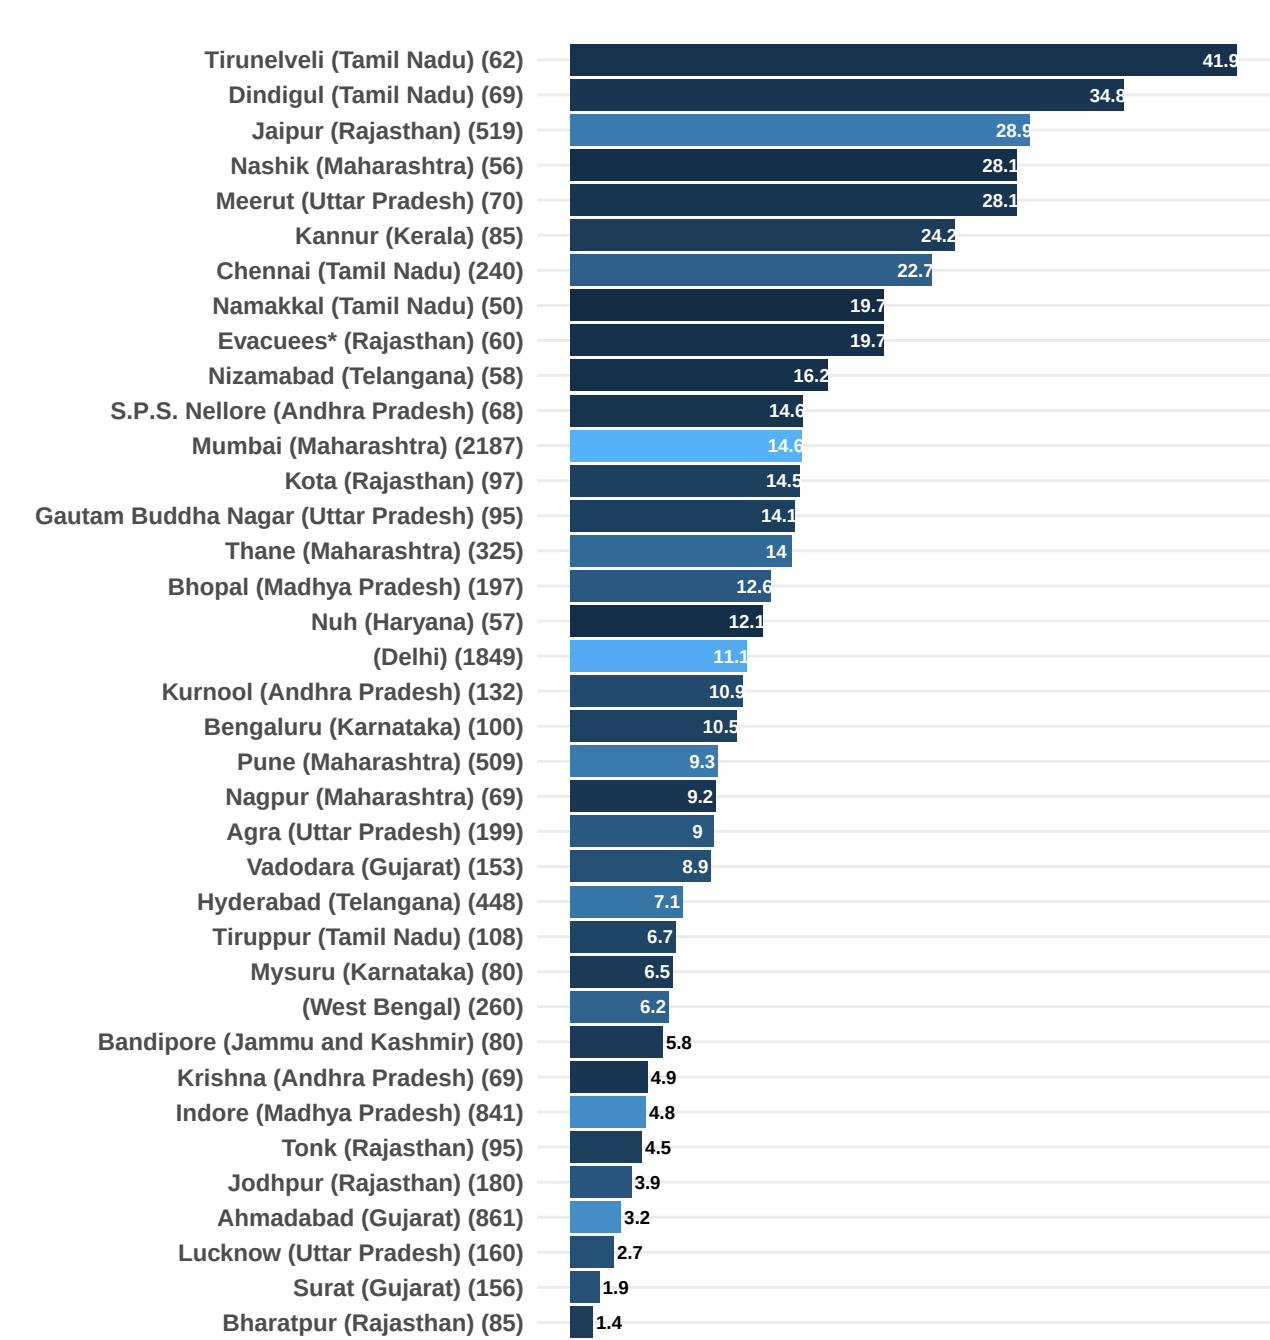

Gujarat
1376 total cases
Now doubling every 3.6 days

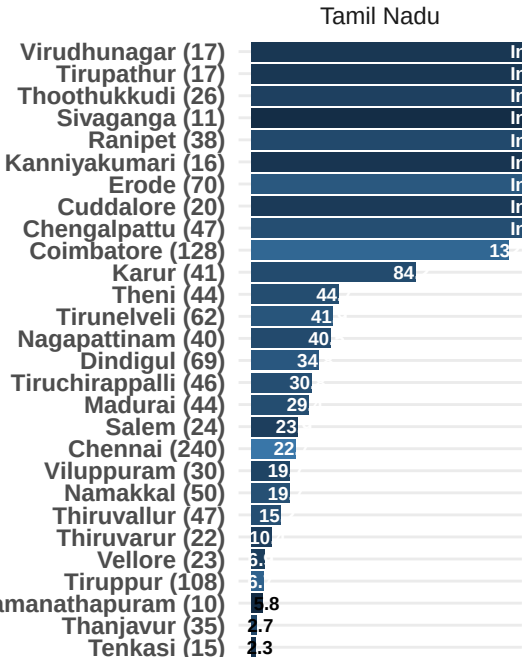

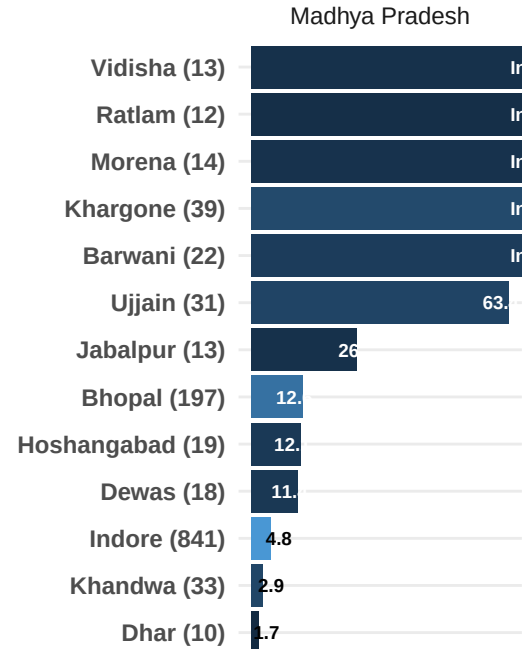

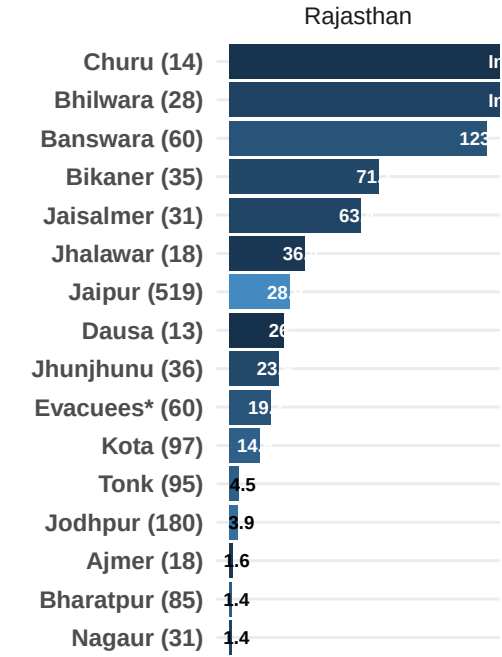

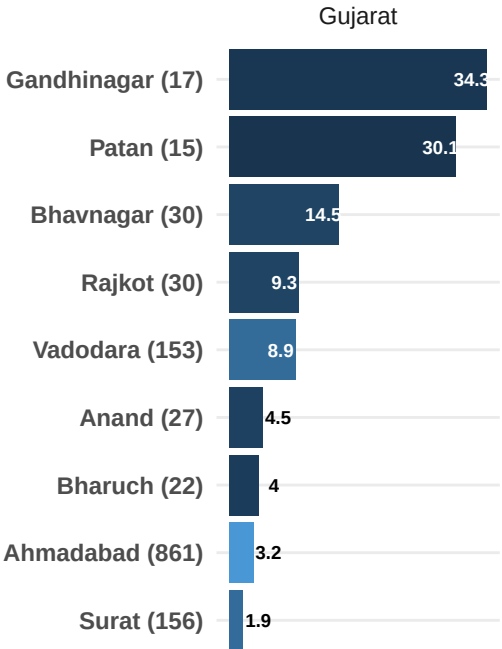

In fact, there is wide divergence within states as well
Within states, we see high divergence in doubling rates across districts

Within Karnataka as well, we see vastly different growth rates by district.
Currently, our major concern is a cluster of districts in North Karnataka which are showing rapid growth

Prevalence and growth of covid-19 cases in Karnataka
19 April, 2020

Doubled in 1 week OR 70% growth in last 3 days

Low growth in last 1 week

No new cases in last 1 week

Zero cases
